AZ CORP COMMISSION  
DOCKET CONTROL

**MAYES PROPOSED AMENDMENT # 2**

TIME/DATE PREPARED: May 5, 2008, noon

COMPANY: Double Diamond Utilities

DOCKET NO: WS-20543A-07-0435

AGENDA ITEM: 20

OPEN MEETING DATE: May 7, 2008

DOUBLE DIAMOND UTILITIES, INC.  
MAYES PROPOSED AMENDMENT #2

Page 8, line 17, INSERT NEW FINDING OF FACT: "The record reflects that DDU intends to take some steps to encourage water conservation in the First Phase of the proposed development, including requiring rain catchment devices on homes as a condition of receiving service from the water utility, and installing purple piping to common areas of the development to allow for use of recycled water in these areas. However, because the Commission is particularly concerned about water adequacy in this region of Arizona, and because the record reflects that groundwater aquifer studies currently underway at USGS and ADWR are not yet complete, and the cumulative impact on water supplies of a number of residential developments in Mohave County is not yet fully known, the Commission believes that DDU should undertake additional water conservation measures. Specifically, in addition to the rain catchment feature and purple piping to common areas, DDU should adopt four of the Best Management Practices ("BMP's") currently being promulgated by ADWR in its Best Management Practices Rulemaking, as a condition of providing water service in the proposed developments. The Commission believes this to be reasonable, as the record demonstrates that DDU will serve more than 2,000 customers in its first five years, and 20,500 single family units and 4,500 multi-family units at build-out."

Page 23, line 3, INSERT NEW ORDERING PARAGRAPH: "IT IS FURTHER ORDERED that Double Diamond Utilities, Inc., in addition to the conservation measures it has stated in this case that it intends to implement, choose four Best Management Practices from DWR's BMP rulemaking and implement them as a condition of providing service to new customers."
